

AL SAID ECONOMICAL GROUP Contracting Field

Brief profile

AL SAID ECONOMICAL GROUP is founded since 1954 In Baghdad – Iraq. By the efforts of its founders, the group's activities extended to Syria and Jordan to become international multi -disciplinary group specialized in (Contracting (construction & Electro Mechanical contracts), International Commerce, Agricultural, Industrial, Telecommunication, Education and Investment). Each of the aforesaid disciplines is performed by one affiliate company of the group's companies which has an independent identity legally registered by the local authority where it is founded.

Contracting Field

The affiliated Contracting Companies:

- 1- Al Said Group Co. for Electro- Mechanical Contracts & Solar Energy Systems Ltd.
- 2- AL -Watan AL - Arabi for Construction Contracts Co. Ltd

Contracting sector is considered as one of the important business sectors that have contributed and still contribute in building infrastructure and sustainable projects as well as other vital facilities to provide community upgrading services.

The two contracting companies of Our group, Al-Watan Al-Arabi for Construction Contracts and Al-Said Group Co. for Electro-Mechanical Contracts and Solar Energy Systems. Ltd., have contributed in implementation of many projects and have a long history of work in Iraq.

Al Said Group Co. for Electro- Mechanical Contracts & Solar Energy Systems Ltd

AL Said Group Co. for Electro-Mechanical Contracts and Solar Energy Systems. Ltd & in cooperation with Al-Watan Al-Arabi for Construction Contracts has Succeeded in Implementation assignments (Contracts) for ALYOUSIFIYAH THERMAL POWER PROJECT (840 MW) with Russian Company (TECHNOPROMEXPORT) and took over the task of Project Management after the Russian company left Iraq due to security situation.

Sample of Works Done:

1- ALYOUSSEFIYAH TERMAL POWER STATION 840 MW Project

AL Said Group Co. for Electro-Mechanical Contracts and Solar Energy Systems Ltd has contributed in Construction & Erection Equipment for **Al Youssifiyah Thermal Power Station 840 MW** (South of Baghdad - Iraq) with **Russian company (TechnopromExport)**. The works executed directly by our well trained staff, qualified and holding the highest academic certificates.

AL Said Group Co. for Electro-Mechanical Contracts and Solar Energy Systems Ltd together with its sister company **ALWATTAN ALARABI Co. for Construction contract Ltd.** who is specialized in construction and civil works both executed many assignments in **Al Youssifiyah Thermal Power Station 840 MW Project**.

The works executed with high standard and handed over to **the Russian company and Iraqi Directorate of Al Youssifiyah Project and Iraqi Ministry of electricity** with full satisfaction and in compliance with the project specification.

During implementation of the works and because of security situation **The Russian Company (TechnopromExport)** left Iraq. Accordingly **The Russian Company TechnoPromExport** assigned the task of project management to **ALWATTAN ALARABI Co. for Construction contracts Ltd.** The works continued without any interruption due to **Russian company** departure. Whereas **AL Said Group Co. for Electro-Mechanical Contracts and Solar Energy Systems Ltd** has employed thousands of skilled labors and qualified Engineers for execution the works including carrying out quality assurance on the executed works using advanced testing equipment such as X-ray and ultrasonic equipment construction material testing equipment all done under supervision and witness of third party independent testing company who has contracted with **Ministry of Electricity**.

The work also includes transport the huge Electrical Transformers (Weight: 400 Ton, Power: 210 MW) under guidance and guardianship of guards from our Tribe. The journey started from Turkish Iraqi Borders across a perilous road until its destination which is ALYousifiyah Project.

The works include but not limited in (Thermal power station in Yousifiyah) to the following:

- 1.1- All electrical installation including installation main & sub-main panel boards & transformers in the plant.
- 1.2- Installation of mechanical works.
- 1.3- Fabrication & Erection all types of Steel ducts (Heat, Air & Smoke) (total weight steel used 1044 tons).
- 1.4- Fabrication & Erection steel structure trestle for service pipes long (total weight of steel used in construction the trestle 9980 tons).
- 1.5- Supply, erection, welding & testing all services pipes Dia. 57mm-520mm the total work done 40 lines, 80km meter run and total weight of Steel used 4950 ton)
- 1.6- Fabrication & erection Steel pipes of large diameters.
- 1.7- Fabrication & Erection Fuel Storage Tank 100000 Cu Mr. capacity
- 1.8- Carry out test for the welding works X-Ray Test & Ultra-Sonic Test done by our technical staff and using our testing e equipment.
- 1.9 Transportation, Provision Security during Transportation up to the Project Site and Erection Large Capacity Electrical Transformer.

2- Bayan University Complex project – Erbil -Kurdistan Iraq

- 3.1 Electrical work including installation all equipment (power and electronic) For Bayan University Complex project.
- 3.2 Ventilation , Air-condition, Plumbing & Sanitary works including all equipment and fixtures for Bayan University Complex project

3- Hotel Building Project 3 Basements + 7 stories building – Amman

- 4-1 Supervision and follow up projects needs technically and financially (Management) for Electrical Work, installations and equipment (power and electronic).
- 4.2- Supervision and follow up projects needs technically and financially (management) for Electrical Work, installations and equipment (power and electronic).

- 4-** Fabrication and Erection several fuel and water storage tanks of different capacity as well as the erection of utility pipe networks for Electrical Power Reconstruction Projects in IRAQ during the year 1991, at Dora, South Baghdad, Al Nasiriyah, Hartha, AlNajeebia, Baiji and Al- Taji power stations, in addition, participation in other similar works.

Field of Business & services provided:

A – Electrical:

1. Supply & Erection complete Power Plant (Thermal, Gas, gasoil)in cooperation with Russian Companies (TECHNOPROM EXPORT) & (ORGRES FIRMA LLC).
2. Maintenance all kinds of Power Plant & Oil Refineries , Electrical Motors, Turbines, Boilers, Pumps, Gen sets In Cooperation with (IED Holding INTEGRATED ENERGODEVELOPMENT – TATARISTAN)
3. Provide & Installation of Solar systems & Training Programs for residential communities, individual houses and public utilities in cooperation with Finland Company
4. Supply and Installation Energy Production Plants From Waste within scope of Bio-Mass in cooperation with (bio Energy for energy solutions) – USA
5. Provide & Erect Zero-Emission Power plant. In cooperation with (JENROLA Power LLC – USA & ZEG POWER) It is Green Power Solution for generating electricity to the existing distribution lines directly by setting up Micro-grids that will provide electricity into every house, office, and industries without the need for transmission grid. The capability far exceeds the need of any country. The end result of our work is better stability, higher efficiency, very low energy and maintenance cost, and better overall performance. This advancement is a true revolution in the history of generators.
6. Supply and installation of Power Transmission Towers. (The Towers are produced in our sister company ALHAYALY for Production Steel Pipes & Profiles)
7. Supply &Installation of Over Head Power Transmission Lines and Substations.
8. Supply & Installation Electrical Transformers, Feeder Pillars, Underground cables, Substations for Power distribution, Main Cubical Switch boards, Distribution Boards and all Electrical Equipment and Implementation of Electrical contracts whether for Industrial Amusement parksetc.

B- Mechanical:

- Supply & Erection of large capacity storage tanks for Oil Refineries and Power Production Plants.
- Supply & Installation of high Performance Boilers (Water and Steam) for Industrial, Refineries & Power Plants.

AL-SAID ECONOMICAL GROUP.Intl. Trade- Industry- Agriculture- Contracting

- Installation and putting into operation of water treatment plants.
- Steel structures for Buildings, Workshops, Warehouses & Aircraft Shelters ..Etc.
- Fabrication and installation of Steel pipes Size (25-2500mm) diameters.
- Supply and Installation of Water supply, West & Drainage Networks with all Installations and Fixtures, Ventilation, Air conditioning and Firefighting Systems for industrial projects, commercial buildings, schools , hospitals.. etc.
- Supply and Installation heat exchangers.
- Carry out welding of ferrous and non-ferrous Metals
- Carry out Quality Control tests for metal welding, dimensional checking, Alignment, level straightness Using X- Ray, Complete lab. For developing and printing X- Ray films, Ultra - sonic detector, Metrology equipment, including Complete workshop for soil, concrete and other construction materials inspection.

Our Offices:

IRAQ - (Baghdad)

JOURDAN (Amman)

SYRIA

IRAQ - Kurdistan (Erbil)

Our Clients:

- Ministry of Electricity – Iraq
 - General Companies for Production-North, Central, Middle Euphrates, & south
 - General Electricity Transmission company – North , Central, Upper& Middle Euphrates& South
 - Electricity Distribution Company – Baghdad, The Middle, The north & south.
- Ministry of Oil – Iraq
 - Oil company – North, Midland & South
 - Oil products Distribution company
 - Oil pipe lines Company
 - Dora Oil refinery, North Oil Refinery Com, South Oil Refinery
 - Oil Projects Company
 - North gas Company, South Gas company

- Ministry of Natural Resources – Kurdistan Iraq
- Ministry of Electricity – Kurdistan Iraq
- UNGM (United Nations Global Market)

ALWATAN ALARABI for Construction Contracts Ltd

ALWATAN ALARABI Co for Construction Contracts Ltd. was established in Iraq Baghdad decades ago (Since 1954) By its founder The Late **Mohammad Said ALHAYALY**.

ALWATAN ALARABI Co. has contributed in implementation of many projects in Iraq in the field of Its Business (Civil and Construction contracts) and Turnkey Projects.

What is favoring **ALWATAN ALARABI Co for Construction Contracts Ltd.** is the complementarity in the disciplines in its business through the existing of the following affiliated companies of **Al-Said Economic Group** in the field of electromechanical contracting and in general international trading.

Al-Said Group Co. for Electro-Mechanical Contracts & Solar Energy Systems

And

Al-Said Group Co. for International General Trade Ltd

During the course of Business activity **ALWATAN AL ARABI Co.** has implemented many Turn-key projects in Iraq, including but not limited to, the implementation **AL YOUSIFIYAH THERMAL POWER PLANT** Capacity of 840 MW At **AL YOUSIFIYAH** City South of Baghdad, with Russian company **TechnoPromExport**. Whereas **ALWATAN AL ARABI Co** proved high efficiency performance (Quality & Commitment) during the implementation of the contracted assignments, this led the Russian company **TechnoPromExport** to award the management of **AL YOUSIFIYAH THERMAL POWER PLANT** Project on **ALWATAN AL ARABI Co**. Then after the Russian company left the project and left Iraq hastily because of the security conditions at that time.

ALWATAN ALARABI Co. Owns the following factories:

- Ready- Mix Concrete plant.
- Clay Bricks Factory.

- Fine Gypsum Factory.
- Natural Marble Cutting to Shape & Polishing Factory.
- Sieving, Washing & Grading Sand & Stone Aggregate Factory.
- ALSAID Factory for Developed Industries for Fabrication Fiberglass and Reconstituted Marble

• INTERNATIONAL COOPERATION & AGENCIES

ALWATAN ALARABI Co. for Construction Contracts Ltd. has been able to cooperate with international companies and obtained business cooperation with the following companies:

- SEAN Group of Companies – Russia specialized in General Contract Construction of large Facilities, & Complexes of health- Resort, Hospitals, Commercial Complexes Projects , Landscape, ...ETC.
- TechnoPromExport - Russia

Field of Business & services provided:

- Turn-Key Projects, Domicile and Housing Projects, Commercial Complex projects, Recreation projects, Schools, Hospitals, High Rise Buildings, Etc. in cooperation with **SEAN GROUP of Companies- Russia**
- Highways, Bridges, Rail Ways, Tunnels, Airports,
- Civil & Construction Works for Power Plant Project`s Facilities.
- Civil & Construction Works & Turn-Key Projects for Water & Sewerage Treatment plant.
- Elevated, Ground Mounted & Underground Water Tanks.
- Water Supply Network, Sewerage Network & Rain water Drainage Network.

Sample of Previous Project

- **Schools Projects**

Location: Iraq

Execution Several Schools for (216 School) project in different locations in Iraq.
Each school (24 class room + Multi-purpose Courtyard + Laboratories + Offices)

- **Tourist & Recreation City Project**

Execution of AL- HABBANIYAH Tourist City in cooperation with the French company on the banks of ALHABBANIYAH LAKE at ANBAR Province. The project includes chalets of different areas, Hotel & Recreation Land Spaces for different ages if people.

- **ALYousifiyah Thermal Power Plant Project Capacity 840 MW**

Location: Al Yousifiyah – South of Baghdad – Iraq

- Project Management contract was awarded to **AL WATAN ALARABI co** by The Russian Company **TechnoPromExport** whereas the Russian management team left Iraq due to security situation.
- Execution of Boiler Building and Buildings of other facilities.
- Execution of water intake and discharge canal of Reinforced concrete.
- Execution of Site civil works, Earth works & site boundary wall.
- Supply ready mix concrete to other contractors who were working at the site to execute other facilities in the project.

- **Bayan University Complex Project**

Location: Erbil -Kurdistan Iraq

Bayan University complex includes Lecture Rooms (68 Nos.), Scientific laboratories (12Nos.), Engineering Drawing Studio (6 Nos.), Engineering Workshops (6 Nos), Library, Administration offices, Teachers Rooms, Cafeteria and Open green Area, Including Toilets & lavatories with a total building area (10000 square meters).

- **Hotel Building Project**

Location: Amman- Jordan

The project is High rise Building of Three stories Basement + Ground Floor + Mezzanine + 7 Typical Floors + Roof.

The project includes the following facilities:

Gymnasium, 2 Nos .Cinema, Hotel Reception, Coffee Shop, 35 Hotel Rooms with Bathroom, Panorama Coffee Shop, 3 Electrical lifts, Air-conditioning, Fire Alarm & Firefighting System, Evacuation and Calling System, Etc. with all necessary facilities.

AL Said Group Co. For International General Trade Ltd

Company Profile

Al-Said Group for International General Trade Co., Ltd a subsidiary of **Al-Said Economic Group**, was established in Iraq according to the laws, regulations and instructions in force in Iraq in relevant to international trade companies.

Al-Said Group for International General Trade Co., Ltd has contributed with **Al-Watan Al-Arabi Company for Construction Contracts Ltd** and **Al-Said Group for Electro-Mechanical Contracts and Solar Energy Systems Ltd.** in the supply materials for **Al-Yusifiyah Power Plant project**, 840 MW which was implemented with the **Russian company TechnoPromExport.**

Iraq has cooperation agreements, partnerships and representation of many international companies in various fields

Al-Said Group for International General Trade Co., Ltd has concluded several commercial contracts in Iraq such as but not limited to:

- **Supply Large Capacity Electric Motors (12 Nos) for North Cement Company**
- **Refractory Bricks for industrial furnaces QTY (10000) Ton**
- **Carbon Black (3500) Ton for manufacturing Vehicle Tires for Dywania Tire Factory – Iraq**
- **Steel Ropes (4750) Ton For General Company of ports of Iraq.**
- **Wheat Grain, Edible oil , Sugar & Infant Milk.**
- **Supply Laboratory Instruments for (Civil Engineering, Physics, Chemistry& Surveying), language and Informatics labs and complete furniture, student desks smart Boards Etc... For BAYAN University (Former British Royal University) – Erbil**
- **Complete Furniture for Hotel Project – Amman- Jordan**

Environment Section

Al-Said Group for International General Trade Co., Ltd has opened New Department Specialized in **Environment (studies and solutions)** due to importance of the environment and its impact on the quality of community life whereas the world facing a great challenge in this issue due to industrial renaissance , successive increase in population, diversity of services and consumption pattern of communities all result

existence diverse amounts of wastes and waste Industrial and chemical) thus, all require provision of solutions and treatments to convert them into environmentally friendly materials, some of which can be used for the purpose of recycling in manufacturing industries and others are disposed of in landfills.

The company's headquarters and offices

IRAQ

Baghdad – AL MANSOOR
Erbil – Golan St.-Bayan University Complex

Company Sections:

• Energy Section (Conventional, Clean & Renewable Energy)

- Supply Mobile Power Plants Capacity (1) MW up to (25)MW
- Supply power Generator Sets Capacity (10) kW up to (1)MW
- Supply and Erection of Solar power plants for residential communities, individual houses and public utilities.
- Supply and Erection of wind farm system power plants with that includes residential communities, residential complexes and public utilities.
- Supply Electricity Transformers of different types and capacities.
- High-voltage power transmission towers and lighting poles.
- Supply of electrical cables and wires of all kinds (low voltage and Medium voltage as well as high Voltage), instruments cables& fire cables.
- Supply of substation equipment.

• Petroleum and Petroleum Products

- Sale and Brokerage for sale crude oil and oil derivative.
- Supply Stationary and Mobile oil Refineries.
- Supply crude oil pipelines
- Supplying all types of valves for crude oil pumping stations, Petroleum, Petrochemical and Gas industries.

AL-SAID ECONOMICAL GROUP.Intl. Trade- Industry- Agriculture- Contracting

- Supply additives used in manufacturing petroleum products and wells lining materials.
- Supply of oil well head equipment, Christmas tree, pipes, pumps, measuring and control equipment for the oil and gas industry.
- **Construction equipment & materials,**
 - Supplying thermal bricks for industrial furnaces
 - Supply all construction materials for infrastructure projects , buildings, roads and bridges
 - Supply Construction Equipment (Concrete Mixers, Dumpers, Compaction Equipment, Machines (Earth Movement Machines)... Etc.
 - Supply Reinforcement & Steel Tubes, Rods & Sections.
 - Supply complete Steel Structure warehouses & shelters.
 - Supply Doors & Windows with all necessary accessories & Ironmongery.
 - Supply All Sanitary Materials, Bathroom Sets & fixtures.
- **Food , Agricultural Materials and Equipment**
 - Supply Food Grains such as (wheat, corn, Rice, Beans ...Etc), Wheat Flour, Sugar, and Edible Oil. Canned, Chilled and Frozen food (Vegetables, Red Meat, Poultry and Fish)
 - Supply pesticides, Fertilizers (Urea, organic ...Etc.) and application equipment.
 - Supply seeds & onions, beets and potatoes bulbs
 - Supply of agricultural pumps & Power Generator Sets.
 - Supply Agricultural Sprayers (Fixed & Pivot), irrigation network materials and pesticide sprayer.
 - Supply agricultural aircraft, tractors and harvesters
- **Section of surveillance , tracking equipment , personal protection and fire alarm equipment**
- **Environment Section (Studies and Solutions)**

ALSaid Group Co. for International General Trade Ltd offers a package of integrated environmental services in the region and Arab world, which puts us

among the leading companies in providing the following environmental protection services.

- Provide integrated environmental solutions with a holistic perspective and forward-looking vision found playing a pivotal role in raising the quality of life in cities.
- Provide consultancy support services including environmental impact assessment, environmental monitoring, environmental inspection, training activities and community service initiatives.
- In cooperation With **Bio-Energy for Energy Solutions - USA**, we have integrated solutions enable us to treat waste in general, medical waste, industrial waste, industrial wastewater and water purification, as well as solutions to provide services for sewage landfills to ensure the protection of groundwater and to recycle solid waste and industrial waste and others.
- **Recycling Waste into Electricity** in cooperation with **Bio-Energy for Energy Solutions - USA**
- In cooperation with (**JENROLA Power LLC – USA & ZEG POWER**) we can provide Green Power Solution for generating electricity to the existing distribution lines directly by setting up Micro-grids that will provide electricity into every house, office, and industries without the need for separate transmission grid

Quality

Our company adheres to quality standards and keen to lead in its application and these values are at the heart of our company methodology.

● Brokerage and Commercial Agencies Section

○ **Commercial Brokerage**

This section is concerned with the commercial intermediaries for the sale and purchase of crude oil and oil derivatives.

Our role as an intermediary is not only in ensuring the completion of the required business process, but in researching and surveying the most suitable offers and the best specifications to ensure a business process of real benefit and benefit Of the Contracting Parties

○ **Commercial Agencies**

Al-Said Group Co. for International Trade. Ltd. seeks to develop and upgrade its capabilities and its services in order to provide the latest technologies and Highest Quality of goods to our client and local markets that, through concluding & signing cooperation agreements and bilateral understandings, as well as conclusion contracts for representation and commercial agencies with International manufacturers and producers.
